EVERYDAY WELL

The Recovery Bar

15 whole-fruit electrolyte drinks that put back what you sweat out

15 drinks · 6 spritzers · 3 coolers · 6 smoothies · Shopping list by aisle

What you sweat out

Sweat is mostly water and salt, with some potassium and magnesium. Water puts the water back. The rest comes back from food.

These are the drinks a good juice bar makes: whole fruit muddled or blended, fresh herbs, coconut water, a salted rim, served cold in the right glass. Fruit brings the potassium, coconut water and yogurt add more, cocoa and nut butter bring magnesium, and the rim brings the sodium. Every card counts all three.

Today's menu

Salted Cherry Lime Spritz	320
Pomegranate Coconut Fizz	720
Coconut Pineapple No-jito	315
Orange Pomegranate Sunrise	645
Ginger Lime Mule	335
Raspberry Lime Rickey	355
Mango Chili Lime Cooler	530
Kiwi Coconut Cooler	840
Hibiscus Lime Cooler	270
Banana Coconut Recovery Smoothie	1,065
Chocolate PB Banana Shake	880
Orange Creamsicle Smoothie	970
Blueberry Almond Smoothie	550
Pineapple Avocado Smoothie	945
Salted Lime Lassi	400

MG POTASSIUM PER GLASS

How to read a card

- The three numbers are the potassium, sodium and magnesium in the glass, in milligrams. Each one is worked out from USDA FoodData Central, ingredient by ingredient.
- A drink with a salted rim shows the rim on its own line, because how much of it you drink is up to you.
- Every recipe makes one glass. Double it for two.

How to salt a rim

Put ⅛ teaspoon of salt on a saucer. Run a lime wedge around half the rim and dip it. Salting half the glass means you choose each sip, and the card tells you what the rim adds: about 290 mg of sodium.

Most drinks also take a dash of salt in the glass, about 155 mg. In a spritz or a smoothie you'll barely taste it.

Want it sweeter? A teaspoon of honey or a drop of stevia. Neither changes the numbers much, and the stevia adds none.

Before you salt anything

If a doctor has told you to watch your sodium or potassium (for blood pressure, your kidneys, or a medication), ask them before adding salt or coconut water to your drinks. These are recipes, not medical advice, and they aren't a replacement for drinking water through the day.

Spritzers

SPRITZER · MAKES 1 GLASS

Salted Cherry Lime Spritz

Tart cherries and lime under a salted rim, like a margarita.

320	190	15
mg potassium	mg sodium	mg magnesium

+ up to 290 mg sodium on the rim

YOU NEED

- ½ cup frozen tart cherries, thawed
- 1 tbsp lime juice (half a lime)
- 1 tsp honey
- ½ cup coconut water
- ½ cup sparkling water
- a dash of salt
- ⅛ tsp salt, for the rim
- Lime wedge, to finish

MAKE IT

1. Put ⅛ tsp salt on a saucer. Run a lime wedge around half the rim and dip it.
2. Muddle the cherries, lime juice and honey in the glass until the cherries burst.
3. Fill with ice, add the coconut water and a dash of salt and stir.
4. Top with sparkling water and give it one gentle stir.

320 mg of potassium from the coconut water and cherries. 190 mg of sodium, most of it from the dash of salt, and the rim adds up to 290 more.

Make it easy: Frozen tart cherries are in the freezer aisle by the berries. Thaw a bag in the fridge and it's a week of these.

SPRITZER · MAKES 1 GLASS

Pomegranate Coconut Fizz

Pomegranate seeds muddled into coconut water, topped with bubbles.

720	210	30
mg potassium	mg sodium	mg magnesium

YOU NEED

- ½ cup pomegranate seeds
- ¾ cup coconut water
- ½ cup sparkling water
- 1 tsp lime juice
- a dash of salt
- Lime wheel, to finish

MAKE IT

1. Muddle the pomegranate seeds in the bottom of a glass until they burst.
2. Fill with ice. Add the coconut water, lime juice and a dash of salt and stir.
3. Top with sparkling water.

720 mg of potassium, a little over half of it from the pomegranate seeds.

Make it easy: A tub of pomegranate seeds from the produce aisle saves the seeding.

SPRITZER · MAKES 1 GLASS

Coconut Pineapple No-jito

A mojito without the rum: mint, lime, fresh pineapple and coconut water.

315	190	20
mg potassium	mg sodium	mg magnesium

YOU NEED

- 8 fresh mint leaves
- 1 tbsp lime juice (half a lime)
- ½ cup fresh pineapple chunks
- ½ cup coconut water
- ½ cup sparkling water
- a dash of salt
- Mint sprig, to finish
- Pineapple wedge, to finish

MAKE IT

1. Muddle the mint, lime juice and pineapple in the bottom of a glass until the pineapple is juicy.
2. Fill with ice. Add the coconut water and a dash of salt and stir.
3. Top with sparkling water.

315 mg of potassium, most of it from the coconut water. The pineapple brings half the magnesium.

SPRITZER · MAKES 1 GLASS

Orange Pomegranate Sunrise

Orange on top, red at the bottom, and the prettiest glass in here.

645	190	30
mg potassium	mg sodium	mg magnesium

YOU NEED

- 1 orange, peeled
- ½ cup coconut water
- a dash of salt
- ¼ cup pomegranate seeds
- ½ cup sparkling water
- Orange wheel, to finish

MAKE IT

1. Drop the pomegranate seeds into the bottom of a tall glass and fill it with ice.
2. Blend the orange, coconut water and a dash of salt until smooth.
3. Pour it slowly over the ice and top with sparkling water. Don't stir.

645 mg of potassium, from the whole orange, the pomegranate and the coconut water.

SPRITZER · MAKES 1 GLASS

Ginger Lime Mule

The bite of a Moscow mule, made with fresh ginger and coconut water.

335	50	15
mg potassium	mg sodium	mg magnesium

+ up to 290 mg sodium on the rim

YOU NEED

- 1 tsp grated fresh ginger
- 1 tbsp lime juice (half a lime)
- 1 tsp honey
- ¾ cup coconut water
- ½ cup sparkling water
- ⅛ tsp salt, for the rim
- Lime wheel, to finish

MAKE IT

1. Put ⅛ tsp salt on a saucer. Run a lime wedge around half the rim and dip it.
2. Stir the ginger, lime juice and honey together in the glass until the honey dissolves.
3. Fill with ice, add the coconut water and top with sparkling water.

Coconut water brings nine tenths of the 335 mg of potassium. The salted rim brings the sodium.

Make it easy: A copper mug if you have one. Grate the ginger on the small holes of a cheese grater, skin and all.

SPRITZER · MAKES 1 GLASS

Raspberry Lime Rickey

The soda fountain classic, made with real raspberries.

355	190	25
mg potassium	mg sodium	mg magnesium

+ up to 290 mg sodium on the rim

YOU NEED

- ½ cup frozen raspberries, thawed
- 1 tbsp lime juice (half a lime)
- 1 tsp honey
- ½ cup coconut water
- ½ cup sparkling water
- a dash of salt
- ⅛ tsp salt, for the rim
- Lime wheel, to finish

MAKE IT

1. Put ⅛ tsp salt on a saucer. Run a lime wedge around half the rim and dip it.
2. Muddle the raspberries, lime juice and honey in the glass.
3. Fill with ice, add the coconut water and a dash of salt and stir.
4. Top with sparkling water.

355 mg of potassium. The raspberries bring most of the magnesium. 190 mg of sodium, most of it from the dash of salt, and the rim adds up to 290 more.

Coolers

COOLER · MAKES 1 GLASS

Mango Chili Lime Cooler

Sweet mango with a chili lime salt rim.

530	50	25
mg potassium	mg sodium	mg magnesium

+ up to 310 mg sodium on the rim

YOU NEED

- ¾ cup mango chunks
- ¾ cup coconut water
- 1 tbsp lime juice (half a lime)
- ⅛ tsp salt, for the rim
- ¼ tsp chili powder, for the rim
- Lime wedge, to finish

MAKE IT

1. Mix the salt and chili powder on a saucer. Run a lime wedge around half the rim and dip it.
2. Blend the mango, coconut water and lime juice until smooth.
3. Pour over ice.

Coconut water and mango bring 530 mg of potassium. The chili salt rim adds 310 mg of sodium.

Make it easy: Frozen mango works. Freeze your own fresh chunks so the numbers stay true.

COOLER · MAKES 1 GLASS

Kiwi Coconut Cooler

Bright green and tangy, from two whole kiwis.

840	225	40
mg potassium	mg sodium	mg magnesium

YOU NEED

- 2 kiwis, peeled
- 1 cup coconut water
- 1 tsp honey
- a dash of salt
- Kiwi slice, to finish

MAKE IT

1. Blend the kiwis, coconut water, honey and a dash of salt until smooth.
2. Pour over ice. Strain it first if you don't like the seeds.

840 mg of potassium, split about evenly between the two kiwis and the coconut water.

COOLER · MAKES 1 GLASS

Hibiscus Lime Cooler

Deep red, tart like cranberry, and caffeine-free.

270	195	15
mg potassium	mg sodium	mg magnesium

YOU NEED

- 1 cup hibiscus tea, brewed and cooled
- ½ cup coconut water
- 1 tbsp lime juice (half a lime)
- 1 tsp honey
- a dash of salt
- Lime wheel, to finish

MAKE IT

1. Steep one hibiscus tea bag in a cup of hot water for 5 minutes. Let it cool, or make a jug the night before.
2. Stir in the coconut water, lime juice, honey and a dash of salt.
3. Pour over ice.

Most of the 270 mg of potassium is the coconut water. The hibiscus brings the color and the tartness.

Make it easy: Brew four bags in a quart jar and keep it in the fridge for the week.

Smoothies and shakes

SMOOTHIE · MAKES 1 GLASS

Banana Coconut Recovery Smoothie

The one to make when you're hungry as well as thirsty.

1,065	280	65
mg potassium	mg sodium	mg magnesium

YOU NEED

- 1 medium banana, frozen
- 1 cup coconut water
- 1 cup (6 oz) plain nonfat Greek yogurt
- a dash of salt

MAKE IT

1. Blend the banana, coconut water, Greek yogurt and a dash of salt until smooth.

1,065 mg of potassium, the most of any of the 15, split between the banana and the coconut water.

Make it easy: Peel and slice ripe bananas and freeze them in a bag. A frozen banana makes it thick without ice.

SMOOTHIE · MAKES 1 GLASS

Chocolate PB Banana Shake

Chocolate milk, with a banana and peanut butter in it.

880	185	110
mg potassium	mg sodium	mg magnesium

YOU NEED

- 1 cup 2% milk
- 1 small banana, sliced and frozen
- 1 tbsp unsweetened cocoa powder
- 1 tbsp peanut butter
- 1 tsp honey

MAKE IT

1. Blend the milk, frozen banana, cocoa, peanut butter and honey until smooth.

110 mg of magnesium, the most of the 15. The cocoa, banana, milk and peanut butter each bring a share.

SMOOTHIE · MAKES 1 GLASS

Orange Creamsicle Smoothie

Tastes like the ice cream truck.

970	270	70
mg potassium	mg sodium	mg magnesium

YOU NEED

- 1 orange, peeled
- 1 small banana, sliced and frozen
- 1 cup (6 oz) vanilla lowfat yogurt
- a dash of salt

MAKE IT

1. Blend the peeled orange, frozen banana, vanilla yogurt and a dash of salt until smooth.

970 mg of potassium from the yogurt, banana and orange together.

SMOOTHIE · MAKES 1 GLASS

Blueberry Almond Smoothie

Blueberries and almond butter, thick enough for a spoon.

550	275	80
mg potassium	mg sodium	mg magnesium

YOU NEED

- 1 cup frozen blueberries
- 1 tbsp almond butter
- 1 cup 2% milk
- 1 tsp honey
- a dash of salt

MAKE IT

1. Blend the blueberries, almond butter, milk, honey and a dash of salt until smooth.

The almond butter brings over half of the 80 mg of magnesium.

SMOOTHIE · MAKES 1 GLASS

Pineapple Avocado Smoothie

Creamy without any dairy, from half an avocado.

945	225	55
mg potassium	mg sodium	mg magnesium

YOU NEED

- ½ avocado
- 1 cup pineapple chunks, frozen
- 1 cup coconut water
- 1 tbsp lime juice (half a lime)
- a dash of salt

MAKE IT

1. Blend the avocado, pineapple, coconut water, lime juice and a dash of salt until smooth.

945 mg of potassium from the coconut water and avocado, with the pineapple close behind.

Make it easy: Freeze fresh pineapple chunks yourself, then you don't need ice.

SMOOTHIE · MAKES 1 GLASS

Salted Lime Lassi

A salted yogurt drink from India, made frothy in the blender.

400	405	30
mg potassium	mg sodium	mg magnesium

YOU NEED

- 1 cup plain whole milk yogurt
- ½ cup cold water
- 1 tbsp lime juice (half a lime)
- ⅛ tsp salt

MAKE IT

1. Blend the yogurt, cold water, lime juice and salt for 30 seconds, until it's frothy on top.
2. Pour over ice.

405 mg of sodium and 400 mg of potassium, the most sodium of the 15.
